

# MORE ORGANIZATION – MORE CLARITY

## WITH THE POS-T VARIO DIVIDERS

With POS-T Vario Dividers, you bring maximum flexibility and structure to your shelves. Say goodbye to messy displays and shifting products: the POS-T Vario Divider is the smart solution for an attractive, organized, and sales-boosting shelf layout – whether for small items, wide packaging, or frequently changing assortments.

Thanks to breakable lengths (105 – 580mm in 25mm steps) and various heights (35 – 120mm), the system adapts perfectly to your shelf dimensions and product formats.

Installation is simple, but the impact is big: your products are always clearly separated and attractively presented. This creates a high-quality appearance that not only looks great but also supports purchasing decisions.

### Your benefits:

- Optimal presentation for better shelf clarity and orientation
- Versatile use: Breakable lengths and selectable heights for any shelf situation
- Easy to use: Quick to install, easily adjustable
- Durable quality: Strong and long-lasting
